Travel in Comfort, Safety & Style!

Travel in Comfort, Safety & Style!

Pets and loose objects were rated as the third worst driver distraction. Unrestrained pets become dangerous, possibly deadly, projectiles even in minor collisions. Use of a vehicle safety harness improves safety by reducing potential distractions for the driver. Unrestrained, your pet can be a serious threat to you and your passengers, distracting you or impairing your ability to drive. Also, without restraint, your pet can get seriously injured during quick stops, sharp turns, and accidents.

The Solvit Pet Vehicle Safety Harness is designed with pets' safety and comfort in mind. Heavy-duty straps attach to a fully-padded vest, with a breathable inner layer for optimal pet comfort. Only **FULL METAL** connectors are used at all load-bearing points.

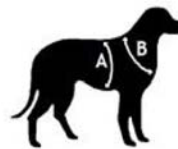

The safety leash integrates with the vehicle's seat belt tensioning device, thus providing range of motion while traveling, but in the case of a sudden stop it locks in place to keep pets secure. This design also makes it easy to load and unload pets, and installs easily in ALL vehicles.

Available in three sizes:
Small / Medium / Large

Sizing Guide

	Chest inches (A)	Neck inches (B)	Weight
Small	12 to 21	12 to 18	6 - 25 lbs (3 to 11 kg)
